## TECHNICAL DATA SHEET

### UMITAN TA / AR CONC POLV.

SYNTHETIC TANNIN

#### *CHEMICAL COMPOSITION*

Synthetic tannin based on phenol

## FEATURES

Appearance: beige powder  
pH in solution at 10%: 3.5 -4.5%

## PROPERTY

**UMITAN TA / AR CONC.** dust is a synthetic tannin weakly acid indicated for use as pre-tanning agent for vegetable leathers. It can be used as a weak retanning of chrome leather. **UMITAN TA / AR CONC.** It is easily miscible with water. It penetrates rapidly and uniformly improving the penetration of the subsequently added plant materials, thus allowing the obtaining of a clean and uniform color of a flower end and smooth.

## HOW TO USE

The **UMITAN TA / AR CONC.** It Can be used before vegetable tanning or mixed in any proportion with plant extracts. In any case, it has a considerable dispersing action. The use of percentages vary in general from 2 to 5%.
